A6546.300.12V/24V 1250mm (ROTATING MODULES) A6556.300.12V/24V 1500mm (ROTATING MODULES)

Why Reg 65?

- Reg 65 applies to rotating (Cat. T) and directional (Cat. X) warning lights.
- It sets a standard for colour, light intensity, light distribution and frequency. Heat resistance, cold start and water ingress are also measured.
- Manufacturers must ensure that all products carrying this approval consistently comply with the standards.
- Customers can have the confidence that products showing this approval from Britax, meet the necessary standard in all markets which have adopted ECE Regulation 65.
- Regulation 65 is the accepted standard in most of Europe.

Why ECE Reg 10.03?

- To ensure the maximum levels of radiated and conducted electronic emissions from the product, do not interfere with sensitive electronic systems on the vehicle. (e.g. engine management systems)
- To provide product protection to radiated and conducted electronic emissions.

Traffic Safety Measures and Signs for Road Works and Temporary Situations 'Chapter 8'

- Chapter 8 is the Traffic Signs Manual extract, which states:
 - Vehicles stopping on highways for works purposes or inspections, shall be equipped with either a roof mounted amber warning light bar, comprising at least two independent light sources, OR
 - Two independent roof mounted amber warning beacons, visible through 360°.
 - Warning beacons or light bars must conform to ECE Regulation 65.
